Serious Health Conditions
Defined by the Family Medical Leave Act

__ ***Hospital Care***

Inpatient care (i.e., an overnight stay) in a hospital, hospice, or residential medical care facility, including any period of incapacity or subsequent treatment in connection with or consequent to such inpatient care.

__ ***Absence Plus Treatment***

(a) A period of incapacity of more than three consecutive, full calendar days (including any subsequent treatment or period of incapacity relating to the same condition), that also involves:

(1) Treatment two or more times within 30 days of the first day of incapacity, unless extenuating circumstances exist, by a health care provider, by a nurse, or by a provider of health care services (e.g., physical therapist) under orders of, or on referral by, a health care provider; or

(2)Treatment by a health care provider on at least one occasion which results in a regimen of continuing treatment (e.g., prescription medication or therapy with specialized equipment but not over-the-counter medications or salves, bed rest, fluid intake, or exercise.) under the supervision of the health care provider. The in-person treatment visit must take place within seven days of the first day of incapacity. *

NOTE: As the accepted practice of the County, the leave process is triggered by an absence of 40 hours or more. While the Absence Plus Treatment scenario is FMLA qualified and only three days in duration, the County practice of using 40+ hours as a benchmark to start the LOA process will continue to be followed. However; there may be cases in which an employee will qualify for FMLA under Absence Plus Treatment with out meeting the 40+ hours as stated in the personnel rule. In these cases, FMLA should be designated to comply with the Act.

__ ***Pregnancy***

Any period of incapacity due to pregnancy, or for prenatal care.

__ ***Chronic Conditions Requiring Treatments***

A chronic condition which:

(a) Requires periodic visits (defined as at least twice a year) for treatment by a health care provider, or by a nurse;

(b) Continues over an extended period of time (including recurring episodes of a single underlying condition); and

(c) May cause episodic rather than a continuing period of incapacity (e.g., asthma, diabetes, epilepsy, etc.).

__ ***Permanent/Long-term Conditions Requiring Supervision***

A period of incapacity which is permanent or long term due to a condition for which treatment may not be effective. The employee or family member must be under the continuing supervision of, but need not be receiving active treatment by, a health care provider. Examples include Alzheimer's, a severe stroke, or the terminal stages of a disease.

__ ***Multiple Treatments (Non-Chronic Conditions)***

Any period of absence to receive multiple treatments (including any period of recovery there from) by a health care provider or by a provider of healthcare services under orders of, or on referral by, a health care provider, either for restorative surgery after an accident or other injury, or for a condition that would likely result in a period of incapacity of more than three full consecutive calendar days in the absence of medical intervention or treatment, such as cancer (chemotherapy, radiation, etc.), severe arthritis (physical therapy), kidney disease (dialysis).
